PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience building Python-based AI/ML and backend applications. Skilled in Flask, FastAPI, Docker, and REST API development, with additional exposure to Generative AI tools (Gemini API, LangChain, RAG). Experienced in building end-to-end ML pipelines, containerized deployments, and full-stack AI applications, backed by two AI/ML internships and a healthcare AI project achieving 94.4% classification accuracy.

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript

Backend & Deployment: Flask, FastAPI, REST APIs, Docker, Spring Boot (secondary)

AI/ML & GenAI: Random Forest, XGBoost, Logistic Regression, NLP, Feature Engineering, Gemini API

Databases: PostgreSQL, MySQL, MongoDB

Tools: Git, GitHub, Postman, VS Code, Docker CLI

EXPERIENCE

AI/ML Intern | Neurocraft Innovations Pvt. Ltd.

Jun 2026 – Sep 2026 (Current)

- Working on Docker containerization of a FastAPI-based AI application, packaging the service and its dependencies for consistent, reproducible deployment.
- Collaborating with the engineering team to structure Dockerfiles and containerized environments for an existing Python/FastAPI codebase.

AI/ML Intern | Infosys Springboard

Dec 2025 – Feb 2026

- Built EcoPackAI, an AI-powered packaging recommendation platform estimating packaging cost and CO2 emissions.
- Developed Random Forest and XGBoost regression models achieving R^2 up to 0.775, exposed via Flask REST APIs.
- Integrated PostgreSQL for pipeline logging, building an end-to-end ML workflow from data input to prediction output.

PROJECTS

CareNav AI — Healthcare Navigation Platform | *Python (Flask), React, MongoDB, Gemini API*

- Built a full-stack healthcare navigation application integrating the Gemini API for NLP-based guidance, achieving 94.4% classification accuracy and a 93.5% F1 score.
- Implemented hash-based health record verification and QR code generation for secure record access.
- Designed REST APIs connecting a React frontend with a Flask backend and MongoDB database.

EcoPackAI — AI Packaging Recommendation Platform | *Python, Flask, PostgreSQL, Random Forest, XGBoost*

- Developed an ML-driven platform predicting packaging cost and CO2 emissions, with models reaching R^2 up to 0.775.
- Built and deployed Flask REST APIs with PostgreSQL-backed logging for the full prediction pipeline.

FinFlow — UPI Transaction Simulator | *Java, Spring Boot, MySQL, REST APIs*

- Built a UPI simulation platform with transaction processing APIs and account management workflows.
- Designed REST APIs and a MySQL schema for handling multi-step financial transaction flows.

EDUCATION

B.Tech, Computer Science Engineering

Expected 2027

Malla Reddy Engineering College for Women, Telangana, India | CGPA: 8.79

LEADERSHIP

- Founder & Community Lead, Microsoft Data Forge Community Hyderabad — organized technical sessions and coordinated industry speakers.
- President, CSI Student Chapter | Class Representative (3 years)

CERTIFICATIONS

- Programming in Java (Elite) — NPTEL
- Artificial Intelligence: Concepts and Techniques — NPTEL
- Python Essentials — Cisco Networking Academy
- Cambridge English: C1 Advanced
